5. **FIRE FIGHTING MEASURES**

---

5.1 **Extinguishing media**

**Suitable:** Use extinguishing media suitable for surrounding fire situation. Material not flammable or combustible.  
**Not Suitable:** None known  
**Special exposure hazards:** Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. In a fire or if heated, a pressure increase will occur and the container may burst.  
**Hazardous thermal decomposition:** Decomposition products may include the following materials: carbon dioxide, carbon monoxide  
**Special precautions for fire-fighters:** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  
**Hazchem code:** Not applicable.

---

6. **ACCIDENTAL RELEASE MEASURES**

---

6.1 **Personal precautions:** No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment (see section 8 of SDS)  
6.2 **Environmental Precautions:** Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  
6.3 **Methods and Materials for Containment and Clean Up Procedures:**  
**Small spill:** Stop leak if without risk. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container.  
**Large spill:** Stop leak if without risk. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with noncombustible, absorbent material eg. Sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations.

---

7. **HANDLING AND STORAGE**

---

7.1 **Handling:** Put on appropriate personal protective equipment (see section 8 of SDS). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas.  
7.2 **Storage:** Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10 of SDS) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully re-sealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containers to avoid environmental contamination.  
7.3 **Combustible liquid:** Not applicable

8. **EXPOSURE CONTROLS / PERSONAL PROTECTION**

---

8.1 **Occupational exposure limits:**

Ingredient name	Exposure limits
Propane-1,2-diol	NOHSC (2002-04-01) Time Weighted Average (TWA) 474 mg/m3 150 ppmForm: VAP_PART <b>Time Weighted Average (TWA)</b> 10 mg/m3 Form: particulate matter

**PRODUCT NAME** Platinum AWB

**Recommended Monitoring Procedures:** If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. References should be made to appropriate monitoring standards. References to national guidance documents for methods for the determination of hazardous substances will also be required.

**8.2 Engineering Controls:** No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

**8.3 Personal Protective Equipment**

**Hygiene measures:** Wash hands, forearms and face thoroughly after handling chemical products, before eating,, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

**Gloves:** Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

**Eye:** Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side shields

**Respiratory Protection:** Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Skin:** Personal protective equipment for the body should be selected based on the task being performed and the risk involved and should be approved by a specialist before handling this product.

**8.4 Environmental Exposure Control:** Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
