TECHNICAL DATA SHEET

TYPICAL PHYSICAL PROPERTIES

Colour:	Clear, colourless, liquid	
Solvent type:	Naphtha (petroleum)	
% Nonvolatile:	Weight*	24 - 26
	Volume*	22.1 - 23.9
	Specific Gravity	0.9
	Viscosity Brookfield LVT (sp1/30rpm/25°C)	10 - 60 cps
	Flash point (°C)	33
	Tg* (°C)	43

*Theoretical values are listed. Actual values may vary depending on test method and coating composition.

DESCRIPTION

Platinum Highlight Matt is an acrylic solution specially developed in a ready-to-use, low odour version for use particularly in enclosed areas where solvent odour buildup would normally be a problem. It provides a hard, yet flexible film, though films will generally have poorer weathering and UV resistance compared with products manufactured in aromatic solvents, such as xylene. Applications include interior and exterior clear coatings and pigmented finishes for protecting concrete and masonry, slate sealers and coatings for pavers. The product is supplied as a 25% solution in White spirits (WS 200) Manufactured in Thailand.

FEATURES

- designed for use on masonry in enclosed areas
- suitable for interior and exterior clear coatings and pigmented finishes
- low viscosity
- compatible with a wide range of industrial solvents
- compatible with most common phthalate and phosphorus plasticizers
- can be blended with a range of other resins including some alkyds

PERFORMANCE BENEFITS

- ready to use formulation
- low odour build-up in enclosed areas
- produces a hard, yet flexible film
