

TECHNICAL DATA SHEET

TYPICAL PHYSICAL PROPERTIES

Colour:	Clear, colourless, liquid	
Solvent type:	R100 / xylene	
% Nonvolatile:	Weight*	23.0 – 25.0
	Volume*	20.7-22.5
	Specific Gravity	0.87
	Boiling Point (°C)	136–145
	Flash point (°C)	26
	Tg* (°C)	66

*Theoretical values are listed. Actual values may vary depending on test method and coating composition.

DESCRIPTION

Platinum Xylene Thinners is an aromatic hydrocarbon solvent that performs well in situations requiring a high level of solvency. Xylene is common to many coating formulations, including general industrial enamels, 2 pack epoxies and polyurethanes.

FEATURES

- High solvency.
- Mid range evaporation rate.
- A widely available and used solvent for specialised uses in the chemical industry.

PERFORMANCE BENEFITS

- **Versatility** – Xylene can be included in any formulation where boosted solvency power is required and will combine well with other organic compounds.
- **Solvency** – Xylene has high solvency of greases, oils and general dirt as well as sophisticated polymeric surface coatings and specific high molecular-weight organics.
