

PREMIUM EXPOSE

TECHNICAL DATA SHEET

TYPICAL PHYSICAL PROPERTIES

Colour:	Clear Orange/yellow, slight viscosity liquid	
Chemical type:	D-Gluconic acid, monosodium salt	
% Nonvolatile:	Weight*	
	Volume*	
	Specific Gravity	1.00
	Viscosity Brookfield LVT (sp1/30rpm/25°C)	
	Flash point (°C)	None allocated
Tg* (°C)		

*Theoretical values are listed. Actual values may vary depending on test method and coating composition.

DESCRIPTION

Premium Expose is used to expose the aggregate in concrete driveways and path surfaces.

Premium Expose works on at concrete to effect retardation prior to the initial set. **DO NOT DILUTE**

FEATURES

- Designed for “wet on wet” application in the manufacture of concrete roof tiles
- Excellent resistance to water and alkalis
- Compatible with a wide range of industrial solvents
- Compatible with most phthalate and phosphorus plasticizers.

PERFORMANCE BENEFITS

- Protects against efflorescence – a common problem experienced in new concrete products
- Excellent exterior durability
- Excellent resistance to UV light
- Can be used for non-roof tile applications, including general purpose concrete and masonry coating

DISCLAIMER

The information provided herein was believed by Premium Sealers specialty chemicals (“Premium Sealers”) to be accurate at the time of preparation or prepared from sources believed to be reliable, but it is the responsibility of the user to investigate and understand other pertinent sources of information, to comply with all laws and procedures applicable to the safe handling and use of the product and to determine the suitability of the product for its intended use.
